EXPERIENCE

The World Bank

Washington, D.C

Short term temporary consultant

September 2025 – May 2026

- Coordinated across economists, country office staff, and external vendors to manage deliverables and information flow for the B-READY flagship report, tracking progress across multiple parallel workstreams.
- Executed systematic desk research on sustainable infrastructure policies and green development trends globally, synthesizing findings into structured inputs for the Building Green project.
- Developed an internal AI chatbot for knowledge retrieval, reducing duplicated research effort across the analytical team, and authored weekly efficiency reports for senior leadership.
- Managed CRM data entry to organize and coordinate 30+ expert profiles per country in support of cross-country stakeholder engagement.

OYE Kenya

Nairobi

Research Assistant

May 2025 – September 2025

- Coordinated implementation of a three-arm RCT with 1,000+ boda-boda motorcycle taxi drivers across 8 provinces to evaluate demand-side barriers to electric two-wheeler (E2W) adoption, including marketing interventions, trade-in programs, and charging infrastructure access.
- Analyzed GPS tracking data, administrative loan records, and three-wave survey data to measure treatment effects on E2W adoption rates, driver revenue, and operating cost reduction, contributing to evidence that E2Ws carry 25% lower total ownership costs than internal combustion engine alternatives.
- Executed high-frequency data quality checks across field enumerator teams, identified and resolved GPS coordinate anomalies traced to enumerator input errors, and maintained firm-level documentation across all treatment arms.
- Developed econometric regression models to evaluate the impact of clean energy technology adoption on driver profitability, directly informing strategic investment decisions by private sector partners in Kenya's transport sector.
- Coordinated knowledge transfer by briefing local research staff on Stata workflows and documenting analytical procedures to support replication and scale-up.

Leiden University

The Hague

Research Assistant

December 2023 – May 2024

- Coordinated bi-weekly research seminars, managed project milestones, and synthesized qualitative findings across the research team to support academic publication on Korean DMZ geopolitics.
- Translated primary sources from Korean to English, bridging linguistic gaps for qualitative analysis

Leiden Model United Nations Foundation

The Hague

Treasurer

June 2023 – June 2024

- Managed a budget of approximately EUR 45,000 for international delegations, achieving a 20% reduction in delegation fees through negotiation with external partners.
- Coordinated travel, venue logistics, and on-site operations for international delegations across multiple countries, serving as the primary liaison between the foundation and external partners.

EDUCATION

Georgetown University, McCourt School of Public Policy

Washington, D.C

Master of International Development Policy

September 2024 – May 2026

- Concentrated in Applied Microeconomics and Quantitative Research Methods
- Relevant Coursework: Advanced Regression Analysis, Impact Evaluation, Adaptive Measurements with AI, Data Science, Experimental Design and Implementation, Development Finance, Applied Economics
- East Asian Policy Association, Head of Research: produced and distributed a bi-weekly East Asian policy newsletter

Leiden University

The Hague

Bachelor of Science in International Relations and Organizations (Honors)

September 2021 – June 2024

PROJECT

IMPACT Initiatives

Washington, D.C

Graduate Capstone Consultant

September 2025 – May 2026

- Managed the end-to-end analytical pipeline for the Multi-Sector Needs Assessment in eastern DRC, coordinating across enumerator teams, partner organizations, and donor stakeholders to deliver datasets covering 8,200+ household surveys and 200+ indicators on schedule.
- Coordinated variable harmonization, consistency checks, and descriptive analysis across two provinces to assess welfare impacts of USAID funding cuts and conflict on food security and displacement outcomes.
- Implemented AI translation tools to process French-language survey datasets, enabling rigorous quantitative analysis of responses from non-English-speaking respondents.
- Developed analytical reports, dashboards, and infographics synthesizing 16,000+ data units, communicating findings to humanitarian clusters and decision-makers across multiple organizations.

SKILLS

Language: Korean (Native), English (Fluent), French (Elementary)

Technical Skills: Stata | R | Python | SurveyCTO | Microsoft Office (Excel, Words) | Customer Relationship Management (CRM) | Git/Github | AI tools (Claude Code, ChatGPT, Gemini)

Core Competencies: Randomized Control Trials (RCT) design | Impact Evaluation | Panel and cross-sectional data analysis | Technical Writing | Program coordination | Data Visualization
